

Power. Boat.

Performance Comes with Power. And It All Starts with Crown.

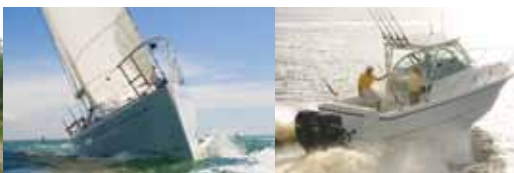

Before you push away from the dock, Crown is there to start your boating action. Our Marine Line covers you with the power for Starting, Deep Cycle and Dual Purpose Marine & RV Batteries.

Why Crown? Crown Batteries are the heavyweight in marine applications. Batteries with more active lead material delivering the power to not only take you out...but bring you back...with power to spare. In head-to-head tests against other marine batteries, Crown outperformed the rest.

Whether you're fishing, trolling, towing skiers and water toys... or just looking for a piece of still water that lets you forget the rest of the world...it all starts with Crown.

The Power Behind Performance

CROWN
MARINE
BATTERIES

Crown Marine Batteries.

Built to Leave All Others in Their Wake.

• **Cold Forged Marine Terminal**
Dual threaded stainless steel and cold forged SAE terminals resist corrosion.

• **Low Maintenance Pod Vent**
For periodic evaluation and seasonal maintenance.

• **Tough Connectors**
Thicker, TTP, COS and Post connectors for premium performance and reliability.

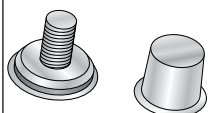

• **Posi-Wrap™ Envelope Separators**
Post-Wrap™ separators prevent failure due to short-circuiting and plate shredding.

• **Powerhouse Plate Construction**
Framed centerline lug plate design with LifePlus™ paste for superior performance and longer life.

Standard Type

Available with Standard Terminal Style

(BCI Type M Type with Dual SAE / Stainless Threaded Terminals)

Key

D = Standard Terminal (Dual Automotive / Stainless Threaded Terminal)
I = Cover with POD Vent
J = Battery Fitted with Handle or Lifting Lug
L = Antimony Alloy Construction: Low Maintenance Service
M = Calcium Alloy Construction: Maintenance Free Service
T = TightPack Cell Construction
